INTRODUCTION

The names Zenith and Helios have for many years been associated with the best, in 'value-for-money' photographic, and top quality optical equipment.

The latest Zenith 12XP SLR camera with its fine specification follows the examples set by its world-famous predecessors in establishing itself as one of the most popular and successful cameras in its price range.

T.O.E. (London) Ltd. constantly ensure to maintain the high standards that have become associated with their name. The comprehensive range of cameras, interchangeable Helios lenses and other optical equipment and accessories illustrated in this catalogue, offer tremendous scope to the photographer, outdoor activist or sports enthusiast. All are designed and produced to give many years of satisfaction and reliability to the user.

ZENITH + HELIOS

ZENITH 12

The heart of a 35mm SLR system of proven pedigree, the Zenith 12XP possesses features found in cameras many times its price! Just read through the specification and judge for yourself the value Zenith offers!

● **Rapid LED viewfinder indication**

A sensitive CdS cell takes accurate stop-down readings through the lens—automatically compensating for the effect of any accessory fitted. Instantly visible glowing signals in the viewfinder indicate over or under exposure — when both signals flash rapidly in sequence 'correct' exposure is indicated. The meter is calibrated for films from 16 to 500 ASA (13 to 28 DIN) and is powered by two G12 cells (supplied).

- A horizontal travelling cloth focal plane shutter speeded 1/30th to 1/500th sec + 'B'.
- Electronic flash synchronised at 1/30th sec. via "hot-shoe" or 3mm co-axial connection.
- Self-timer with approximately 7 second delay — ample time to get in the picture!
- Strong leather-clad ever-ready case and neckstrap — available as an optional extra.
- **Helios 44m-4 Lens** — the 'standard' lens supplied with this camera has a high reputation for optical brilliance and is, according to leading photo magazines, "quite outstanding in its price range". This 6 element F.A.D. lens has 42mm thread mounting for easy substitution of standard 'single-pin' interchangeable auto lenses and accessories. Aperture range: f/2 to f/16 with click stops at full and half apertures (except between f/11 and f/16). Focussing range 0.5m to infinity. Filter size 52mm. Dimensions: 135 x 95 x 93mm. Weight: 900g.

ZENITH 11

Successor to a long line of rugged, reliable 35mm SLR cameras, the Zenith 11 features a host of modern refinements. And don't forget this inbuilt value can be extended still further with an extensive array of easily affordable quality accessories. Features include:-

- Selenium cell metering system, sensitive and accurate, powered by ambient light (**needs no batteries**) and calibrated 16 to 500 ASA/13 to 28 DIN. It gives simple-to-read exposure information on the camera's top plate. Note the new faster films e.g. 1000 ASA can be used with the Zenith 11 camera by manually adjusting the exposure reading obtained.
 - A horizontal travelling, cloth focal plane shutter speeded 1/30th to 1/500th sec. + 'B'.
 - Electronic flash synchronised at 1/30th sec. via "hot-shoe" or 3mm co-axial connection.
 - Self-timer with approximately 7 second delay – ample time to get yourself in the picture!
 - Strong leather-clad ever-ready case and neckstrap – available as an optional extra.
 - **Helios 44m-4 Lens** – as for Zenith 12.
- Dimensions: 135 x 95 x 93mm. Weight: 900g.

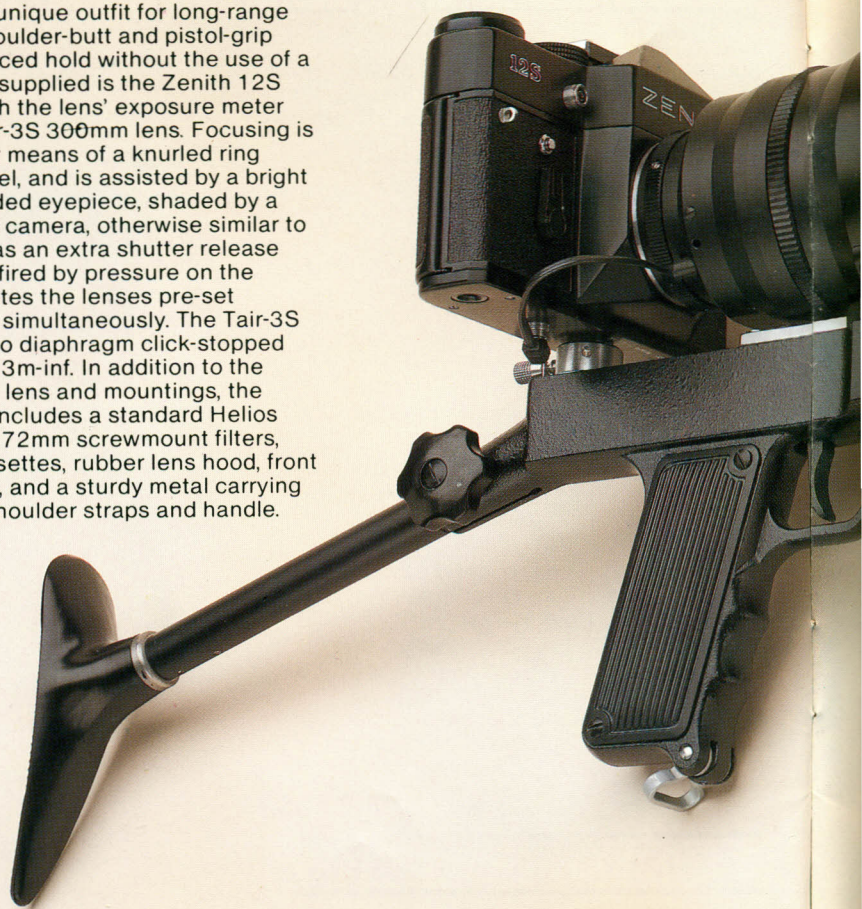

ZENITH + HELIOS

ZENITH PHOTOSNIPIER

An impressive and unique outfit for long-range telephoto work. Shoulder-butt and pistol-grip give a steady balanced hold without the use of a tripod. The camera supplied is the Zenith 12S with built-in 'through the lens' exposure meter mounted with a Tair-3S 300mm lens. Focusing is swift and simple, by means of a knurled ring below the lens barrel, and is assisted by a bright image in the extended eyepiece, shaded by a rubber eyecup. The camera, otherwise similar to the Zenith 12XP, has an extra shutter release button in the base, fired by pressure on the trigger which operates the lenses pre-set diaphragm virtually simultaneously. The Tair-3S lens has a semi-auto diaphragm click-stopped f/4.5-f/22, focusing 3m-inf. In addition to the Zenith camera, Tair lens and mountings, the Photosniper outfit includes a standard Helios 58mm f/2 lens, five 72mm screwmount filters, reloadable film cassettes, rubber lens hood, front and back lens caps, and a sturdy metal carrying case with leather shoulder straps and handle.

 Ideal for sports enthusiasts and nature lovers, the Zenith Photosniper FS-12 is a superbly versatile camera. With its long-range telephoto lens, pistol-grip and shoulder stock, action shots can be captured at a distance with rock-steady exposures.

The Zenith 12S camera which it incorporates can also be seen to advantage (top left) with standard lens.

ZENITH 35F

The Zenith 35F is an extremely versatile compact camera, with a fine specification. It is incredibly easy to use and produces excellent results. Available in traditional black and also in red. It features:

- Focus-free optical glass lens with high resolution
- Built-in flash
- Low light sensor
- Robust construction
- Double exposure prevention
- Built-in lens cover

Specification:

Viewfinder: Telescopic

Lens: Focus-free optical glass lens with high resolution

Focussing range: 1.5 metres to inf.

Relative aperture: f/5.6

Power supply: 2 x 1.5v AA size batteries

Film size: 35mm

Built-in flash: GN 12

Film speed accepted: 100, 200, 400ISO

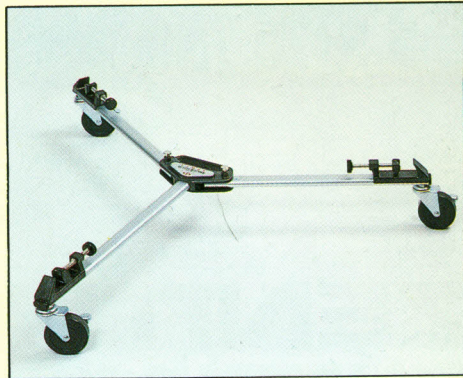

Dimensions: 124 x 76 x 51mm

Weight: 270g (without batteries).

HELIOS TRIPODS

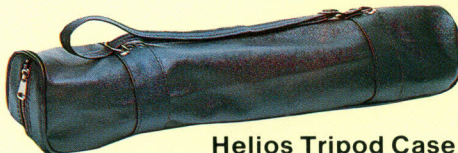

Helios T-61 Tripod Dolly

This rigid, yet fully mobile, tripod platform is an accessory the video and movie enthusiast will appreciate – ideal also for lighting equipment and large format still cameras. Silent running on 75mm castors with individual positive toe-action brakes it will, when erect, take heavyweight tripods with a base diameter up to 85cm (leg locks adjustable up to 55mm dia.), yet with its built-in handgrip is easily portable too! (Folds down to around 550m x 150mm and weighs a mere 1800g.)

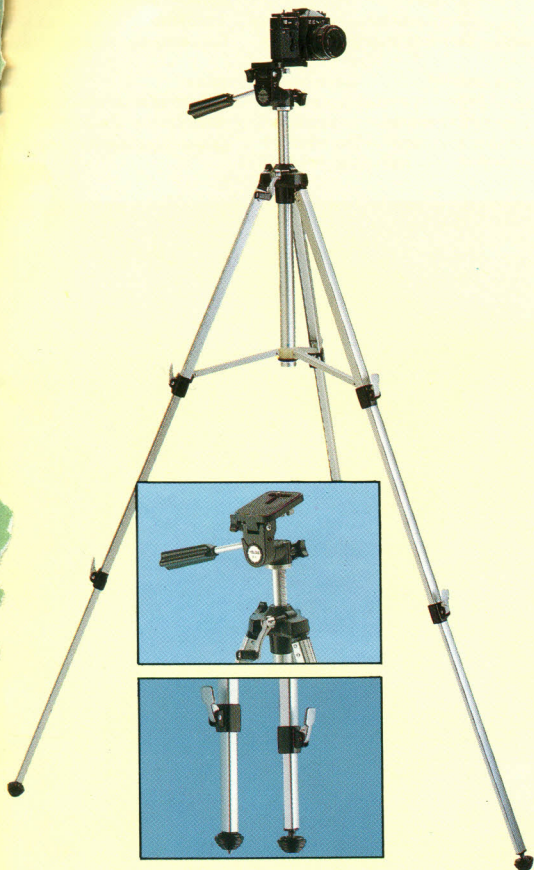

Helios T-1 Tripod

Height: 55cm closed, 133cm fully extended. Sturdy 3-section 'U channel' legs. Quick-change spike/rubber feet for outdoor/indoor use. Individual locking levers for swift and easy leg-height adjustment. Self-erecting centre-brace for extra rigidity. 28cm geared centre column threaded at base for vertical copying or low-level shots. 3 way pan/tilt head with independent controls. Padded platform 60 x 80mm, suitable for most 35mm and roll-film cameras. Bright satin finish with matt black enamel trim. Complete with smart zip-up carrying-case and adjustable shoulder strap.

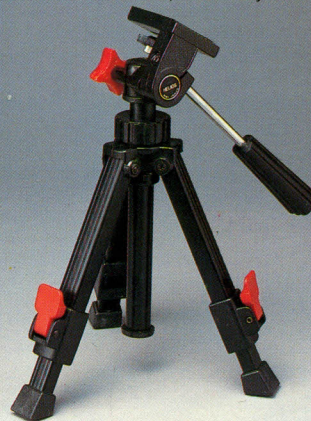

Helios Tripod Case

A supple, simulated leather zip-up carrying case, with soft fabric lining and adjustable shoulder strap. Accepts and protects tripods with an overall size of around 550 x 90mm.

Helios Mini Tripod

Extremely useful for table-top and location work:- Small and light enough to take everywhere with you! Weighs just 575g, measures 25cm closed, 46cm fully extended.

In an unobtrusive matt black finish, this tripod features '2-section' – 'U channel' legs with individual positive quick-release locking levers.

HELIOS

REFLEX LENSES ZENITH FITTING

The Zeniths are system cameras – and these pages show just how much we mean by that. The comprehensive range of precision engineered Helios lenses (illustrated on these pages) offer tremendous scope for the photographer.

All have M42 thread mount to fit your Zenith, and all have been chosen to give you quality and value.

The three zoom lenses cover the complete range from wide-angle through to long telephoto. Each is infinitely adjustable throughout its range, and one has a "close-focus" facility which allows you to approach to within around 9" of your subject.

HELIOS FLASHGUNS

Every photographer needs a flashgun, whether it is just for the occasional family gathering, or for more serious 'studio type' work where special lighting effects are often required. With five models to choose from, you're bound to find the ideal gun to suit your needs!

Compact – this flashgun is perfectly suited for compacts.

Helios 220 – An easy-to-use manual unit with high light output. Ideal for compacts.

Helios 228 – Same size as the 220, but has a higher light output.

Helios 34 – A high light output gun with adjustable bounce head. Auto/manual.

Helios 38 – Another versatile high light output unit with 7 position bounce head. Auto/manual.

*Dependent on battery type (Penlight or Alkaline) and, in the case of Auto flashguns whether Auto or Manual operation is selected.

Helios Slave Flash Unit

For multiple flash photography, this small remote unit simply clips to the coaxial cable of the extension flashgun which is fired in automatic synchronisation by light from the main gun. Works with any combination of flashguns, indoors or out, up to 30 feet away, without the need for trailing extension cables.

HELIOS ACCESSORIES

Helios Close-up Lenses

The simplest way – they screw on to your standard lens like a filter. No exposure adjustment is needed. Available in powers of 1, 2 or 3 dioptres. 52mm screwmount only.

Helios Filters

Skylight. Ultra-Violet and 2x Yellow. Available in both 52mm or 49mm screwmounts (skylight 52mm only).

Helios Auto Extension Tubes

A set of three in 11mm, 20mm and 30mm lengths. Used singly or in combination they allow an even closer approach to the subject than close-up lenses. Reproduction ratios: 1:10 to 1:1 with standard lens. M42 thread mount. A set of Zenith manual tubes is also available.

Helios Macro Bellows

A sturdy unit providing rack and pinion focusing over a continuously variable range (far more flexible than the fixed definite steps of extension tubes) and reproduction ratios 0.8x to 4.2x with standard lens. Rotating, lockable camera and lens mounts. M42 thread mount. Bellows available with Canon/Olympus/Pentax-K mounts (see inset) – adaptor kits available too in same fittings for owners of existing M42 mount bellows.

Helios Teleconverters

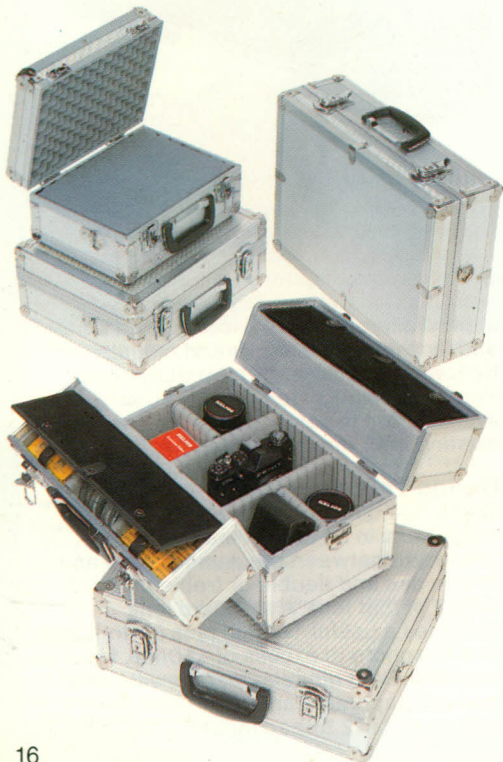

These fine quality fully coated 4 element converters, in 2x and 3x magnification powers, fit between the camera body and lens in use and double or treble the focal length of that lens. A standard lens becomes a useful 100mm plus portrait lens or a telephoto in excess of 150mm, for example. Both models operate with auto/manual diaphragm and come complete with case. M42 thread mount.

HELIOS

GADGET BAGS AND CASES

Helios Aluminium Cases

A range of five sturdy reinforced outfit cases, finished in smart heavy duty aluminium with bright metal trim. All complete with strong carry-handle and locks, two keys and clip-on shoulder strap. Model Nos. TAC-1, TAC-2 and TAC-3 are suitcase style with foam padded lid and base plus replaceable 'diced foam' block, (simply pull out the cubes to the shape and depth required to fit your camera outfit). Model No. TAC-4 is suitcase style, as above, but with rubberised grooved interior and adjustable partitions, Model No. TAC-5 also makes use of rubberised grooved interior and adjustable partitions, but is an

ingenious cantilevered 'toolbox' style with three compartments that fully utilise available space while simultaneously providing ready access to the most comprehensive camera system.

Internal dimensions mm (approx.)

Model	l x w x h	Weight
TAC-1	340 x 270 x 70	2300g
TAC-2	385 X 285 x 75	3050g
TAC-3	285 x 210 x 80	2250g
TAC-4	415 x 300 x 85	3000g
TAC-5*	330 x 180 x 100	3800g

*(main compartment - plus twin lid compartments - 33 x 85 x 85mm)

Helios Black Handybag

Lightweight (315g) padded holdall in water-repellant black nylon with vinyl trim outside, spongeable vinyl interior (dimensions 220 x 120 x 135mm) with removable 3-section partition. Overlapping inner flaps and lid allow instant access via velcro fasteners. Protective feet. Adjustable shoulder-strap.

Helios 2000

Room enough for 35mm camera, lenses, films and much, much, more in this capacious holdall. Main compartment (internal dimensions 235 x 135 x 115mm), plush lined with removable partitions, plus large flapped outer pocket, sealed by snaplock fastener on main cover, for smaller accessories. Smartly finished with light tan nylon outer and contrast trim, protective feet on base, 1" webbing adjustable carrying-strap with non-slip rubber shoulder pad. Weight 370g.

HELIOS

GADGET BAGS /ACCESSORIES

Helios 1500 Handybag

Neat and compact, yet with ample room for 35mm camera, interchangeable lenses, filters and other accessories. In good quality simulated leather complete with adjustable padded shoulder strap.
Dimensions: 180 x 230 x 140mm

Helios Lens Pouches

In supple simulated leather with soft pile lining, and drawstrings for carrying, they provide extra protection for lenses. 3 sizes available – small, medium and large.

Helios Neckstraps

Ideal for cameras or binoculars, these strongly woven straps come in two widths, 50mm bandolier style and 25mm standard – all are fully adjustable and fitted with swivel rings and quick release safety clips.

Zenith Darkroom Phototimer

A lever-wound luminous alarm with 1-minute settings up to 50 minutes maximum. For wall-mounting or table-top use. Dial 4 1/8" diameter.

Leningrad 8 Exposure Meter

A sensitive and accurate selenium cell exposure meter, both compact and lightweight. Easy-to-read dials give clear information of incident and reflected light. Complete with case and lanyard.

Specification:

Film Speeds: 3-1600ASA/6 33DIN
Shutter Speeds: 1/2000th to 30 seconds
Apertures: f/1.4 to f/22
Dimension: 80 x 53 x 25mm.

HELIOS BINOCULARS

All Helios binoculars have precision ground fully coated lenses which give a sharp and brilliant image. With their shock resistant caged prisms, centre wheel focussing and adjustable right eyepiece they are engineered to the highest standards. 'Haze-cutting' filters are supplied for use in poor light conditions.

Some simple facts on binoculars and telescopes.

Using example (10x50). The first part of the code (10x) represents the power of magnification; i.e. the image will appear ten times closer than with the naked eye. Magnifications from 6x-10x are ideal for general use, spectator sports and tourism. Higher magnifications are generally used for more specialized purposes.

The second part of the code (50) represents the effective diameter of the objective lens. The relation between the two figures (10x50) determines how well the binoculars 'see' in dim light. A 7x50 model has more night vision than a 10x50, a 10x50 has more than a 12x50.

	BINOCULARS					
	20 x 60	12 x 40	10 x 50	8 x 40	8 x 30	7 x 50

Guarantee**

5 x 25 with case

HELIOS TELESCOPES

Helios telescopes have precision ground fully coated lenses giving superb optical quality. They are finely engineered to the highest standards and come complete with a "haze-cutting" filter, carrying case and shoulder strap.

ZRT 460 20x50
With easily fixed pistol-grip.
Ideal for target spotting.

Turist4 10x30
For general use
Handy for the
tourist.

Turist3 20x50
Superb for long distance
and target spotting.

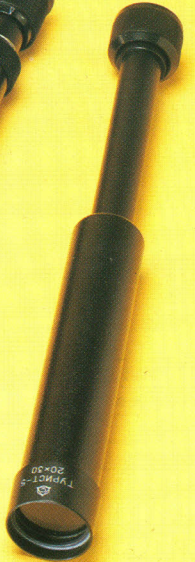

Zenitsa 8-24x40
Zooms from 8x-24x.
A must for the nature lover.

TuristP 8-20x32
Magnification variable
from 8x-20x. Popular
with the tourist.

Turist5 20x30
Ideal for the tourist
and sports spectator.

HELIOS

OPERA GLASSES

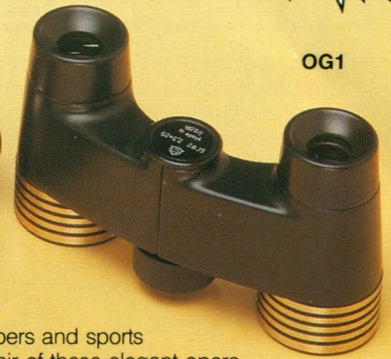

**5 YEAR
Guarantee**

OG4

OG3

OG1

OG2

For theatre-goers and sports enthusiasts, a pair of these elegant opera glasses are indispensable. They can of course be used outdoors too – and the OG1 and OG4 have the advantage of internal focussing which protects the mechanism from dust and moisture. Supplied with a real leather case.

GENERAL USAGE CHART

This information is provided for guidance only so does not have to be rigidly adhered to. In the final analysis much will depend on how comfortable you feel using the equipment. Your local photographic dealer, sports shop or specialist optician is also available to give help and demonstration.

ZENITH + HELIOS

TWO YEAR GUARANTEE

Every photographic and optical product illustrated in this catalogue is fully guaranteed, parts and labour, for a full 24 months from its original date of purchase, against any defects arising from faulty workmanship or materials.

In these circumstances the equipment in question should be returned to the dealer from which it was bought, accompanied by a receipt proving the date of purchase.

This guarantee does not affect or prejudice the purchaser's statutory rights.

Every effort has been made to ensure accuracy of details and illustrations contained herein. We reserve the right, however, to vary, modify or improve any specification and/or design at any time without prior notice.

Some other products from T.O.E.

Vega Snowcap Refrigerators and Freezers

A choice of models to suit every household need - among the features are: brilliant white easy-clean cabinets, luxury interior fittings, magnetic seal, levelling feet, thermostat control - all economical in both price and operation.

Vega Radio and TV

A range of home entertainment products that brings you up to date with the latest in electronic equipment. VHF, LM, MW and SW Radios and Mini-portable b/w Televisions - a great choice from a great range.

Zenith Biolam Microscopes

T.O.E. microscopes share family characteristics with Zenith cameras: optical excellence, fine precision engineering, robust construction and moderate prices. There are models especially suitable for schools and colleges, as well as specialised instruments for industrial and research use.
