# "KIEV-2A"

The "Kiev-2A" represents the highest development of the 35-mm camera. It is a precision miniature camera which gives excellent service and photographic results for highly qualified amateurs, press photographers and scientific workers.

The "Kiev-2A" is of small size and light weight, and the proportions of the body have been nicely designed for perfect compactness.

The range-finder and a larger view-finder are combined in one ensuring speedier manipulation.

The shutter of the "Kiev-2A" camera is synchronized for electronic and flash bulbs and is equipped with a self-timer.

Size of film . . . . .	35 mm
Size of picture . . . . .	24 × 36 mm
Film magazine capacity . . . . .	36 pictures
"Jupiter-8" coated lens:	
focal length . . . . .	50 mm
full aperture . . . . .	f/2
Lens opening scale . . . . .	f/2; f/2.8; f/4; f/5.6; f/8; f/11; f/16; f/22
Distance scale . . . . .	1; 1.2; 1.5; 1.7; 2; 2.5; 3; 4; 5; 7; 10; 20 m and infinity
Shutter exposure speeds . . . . .	$\frac{1}{2}$ ; $\frac{1}{5}$ ; $\frac{1}{10}$ ; $\frac{1}{25}$ ; $\frac{1}{50}$ ; $\frac{1}{125}$ ; $\frac{1}{250}$ ; $\frac{1}{500}$ ; $\frac{1}{1250}$ of a second and Bulb (B)
Range-finder base . . . . .	50 mm

## THE "KIEV-2A" CAMERA SET INCLUDES:

- "Jupiter-8" — 50-mm focal-length, f/2 full aperture coated lens
- Take-up spool
- Magazine with spool
- Lens cap
- Cable release
- Leather carrying case with shoulder strap
- Instruction manual

The sphere of application of the 35-mm cameras can be especially extended by using interchangeable lenses, which are sold separately.

The "Kiev-4" is a high class 35-mm miniature camera of the most up-to-date design. It is equipped with a built-in photo-electric exposure meter.

This camera can be used for all types of photography and will undoubtedly satisfy the most exacting demands of both professional and amateur photographers.

The camera body is of rigid and sturdy construction and has a removable back for loading.

The optical view-finder and range-finder are combined and have a single eyepiece. The view-finder has a magnification of 0.7×.

The lens is focused by means of the range-finder combined with the view-finder.

The "Kiev-4" camera is furnished with a self-timing device for delayed-action automatic shutter release at any exposure speed.

The shutter is fully synchronized for electronic flash and flash bulb operation.

Size of film . . . . .	35 mm
Size of picture . . . . .	24 × 36 mm
Film magazine capacity . . . . .	36 pictures
"Jupiter-8" six-element coated anastigmat lens with internal iris diaphragm:	
focal length . . . . .	50 mm
angular field of view . . . . .	65 to 70°
Lens opening scale . . . . .	f/2; f/4; f/5.6; f/8; f/11; f/16 and f/22
Mount diameter for fitting push-on light filters, sunshades and lenses . . . . .	42 mm
Thread for screw-in light filters and lenses . . . . .	40.5 mm; pitch 0.5 mm
Minimum focusing distance . . . . .	0.9 m
Cloth focal plane shutter with hinged metal strips:	
Exposure speeds . . . . .	$\frac{1}{2}$ ; $\frac{1}{5}$ ; $\frac{1}{10}$ ; $\frac{1}{25}$ ; $\frac{1}{50}$ ; $\frac{1}{125}$ ; $\frac{1}{250}$ ; $\frac{1}{500}$ and $\frac{1}{1250}$ of a second, Bulb (B) and Time
Range of brightness values indicated by exposure meter . . . . .	25 to 100 000 apostilbs
Overall dimensions . . . . .	150 × 89 × 60 mm
Weight . . . . .	1.065 kg

## THE "KIEV-4" CAMERA SET INCLUDES:

- "Jupiter-8" — 50-mm focal-length, f/2 full aperture coated lens
- Film magazine
- Take-up spool
- Lens caps, front and rear
- Cable release
- Leather carrying case with shoulder strap
- Instruction manual

# "LENIN-GRAD"

The "Leningrad" is a masterpiece in 35-mm cameras. It is a precision miniature camera; with careful handling and intelligent use, the camera will give excellent service and photographic results.

The "Leningrad" is of small size and light weight, and the proportions of the body have been nicely designed for perfect compactness.

A spring mechanism being once wound automatically winds the shutter and transports automatically the film allowing to make 10 exposures at a frequency of 3 exposures per second.

The "Leningrad" camera has a flash synchronizer built into the shutter. The shutter is fully synchronized for electronic and flash bulbs and is equipped with a self-timer.

Size of film . . . . .	35 mm
Size of picture . . . . .	24 × 36 mm
Film magazine capacity . . . . .	36 pictures
"Jupiter-8" coated lens:	
focal length . . . . .	50 mm
full aperture . . . . .	f/2
Lens opening scale . . . . .	f/2; f/2.8; f/4; f/5.6; f/8; f/11; f/16; f/22
Distance scale . . . . .	1; 1.2; 1.5; 1.7; 2; 2.5; 3; 4; 5; 7; 10; 20 m and infinity
Shutter exposure speeds . . . . .	1; 1/2; 1/5; 1/10; 1/25; 1/50; 1/100; 1/250; 1/500; 1/1000 of a second, Bulb (B) and Time

### THE "LENINGRAD" CAMERA SET INCLUDES:

- "Jupiter-8" — 50-mm focal length, f/2 full aperture coated lens
- Take-up spool
- Magazine with spool
- Lens cap
- Cable release
- Leather carrying case with shoulder strap
- Instruction manual

The "Zorki-4" is a high-precision camera for 36 exposures on standard 35-mm film which is designed for all kinds of photographic work and meets the most exacting demands of highly qualified amateurs, press photographers and scientific workers.

The range-finder and view-finder of the "Zorki-4" camera are combined and coupled with the lens focusing mechanism. The range-finder has a large base and a dioptical focusing. The camera has a flash synchronizer built into the shutter. The shutter is fully synchronized for electronic and flash bulbs.

The camera has a self-timing device which permits delayed action release.

# "ZORKI-2C"

The "Zorki-2C" is a modern and perfect 35-mm popular miniature camera designed for amateurs and photo-journalists and can be used for all kinds of work: portraits, groups, sport, photography, press work, etc.

The camera is fitted with an optical view-finder and with an optical range-finder coupled to the lens focusing mechanism.

The shutter of the camera is synchronized for electronic and flash bulbs and is equipped with a self-timing device which permits delayed action release.

- Size of film . . . . . 35 mm
- Size of picture . . . . . 24×36 mm
- Film magazine capacity . . . 36 pictures
- "Industar-22" coated lens:
  - focal length . . . . . 50 mm
  - full aperture . . . . . f 3.5
- Lens opening scale . . . . . f/3.5; f/4; f/5.6; f/8; f/11; f/16
- Distance scale . . . . . 1; 1.25; 1.5; 1.75; 2; 2.5; 3; 4; 5; 7; 10; 20 m and infinity
- Shutter exposure speeds . . .  $\frac{1}{25}$ ;  $\frac{1}{50}$ ;  $\frac{1}{100}$ ;  $\frac{1}{250}$ ;  $\frac{1}{500}$  of a second, Bulb (B) and Time

## THE "ZORKI-2C" CAMERA SET INCLUDES:

- "Industar-22" coated lens
- Film magazine
- Take-up spool
- Lens cap
- Cable release
- Leather carrying case with shoulder strap
- Instruction manual

The "Zorki-5" is one of the finest achievements of modern 35-mm miniature camera design. It is equipped with a rapid film advance and shutter cocking lever.

The versatility of this camera for all types of photography and its high-quality performance will satisfy the most exacting demands of both professional and amateur photographers.

The provision of the shutter cocking lever permits the photographer to quickly prepare the camera for the next exposure without lowering it from the eye.

The optical view-finder and range-finder are combined and have a single eyepiece. The shutter is fully synchronized for electronic flash and flash bulb operation.

- Size of film . . . . . 35 mm
- Size of picture . . . . . 24×36 mm
- Film magazine capacity . . . . . 36 pictures
- "Industar-50" coated anastigmat lens with internal iris diaphragm in either a collapsible or non-collapsible mount:
  - focal length . . . . . 50 mm
  - angular field of view . . . . . 45°
- Lens opening scale . . . . . f/3.5; f/4; f/5.6; f/8; f/11; f/16
- Lens mount diameter for fitting push-on light filters, sunshades and lenses . . . . . 36 mm
- Thread for screw-in attachments:
  - for lens with collapsible mount . . . . . 23 mm, pitch 0.5 mm
  - for lens with non-collapsible mount . . . 33 mm, pitch 0.5 mm
- Minimum focusing distance . . . . . 1 m
- Cloth focal plane shutter:
  - exposure speeds . . . . .  $\frac{1}{25}$ ;  $\frac{1}{50}$ ;  $\frac{1}{100}$ ;  $\frac{1}{250}$ ;  $\frac{1}{500}$  of a second and Bulb (B)

## THE "ZORKI-5" CAMERA SET INCLUDES:

- "Industar-50" coated lens
- Film magazine
- Take-up spool
- Lens cap
- Leather carrying case with shoulder strap
- Instruction manual

# "ZORKI-5"

# "ZENITH-C"

The "Zenith-C" reflex camera is a high-grade, precision-built 35-mm miniature camera, delightful to handle, thoroughly reliable and can produce the most perfect pictures almost under any conditions.

The "Zenith-C" camera is a mirror-type camera with a direct image instead of an inverted one.

The camera is recommended for use by amateurs to photograph landscapes, portraits, groups, as well as various sports scenes.

The shutter of the camera is fully synchronized for electronic and flash bulbs.

Size of film . . . . .	35 mm

Film magazine capacity . .	36 pictures
"Industar-22" coated lens:	
focal length . . . . .	50 mm
full aperture . . . . .	f/3.5
Lens opening scale . . . . .	f/3.5; f/4; f/5.6; f/8; f/11; f/16
Distance scale . . . . .	1; 1.2; 1.5; 1.7; 2; 2.5; 3; 4; 5; 7; 10; 20 m and infinity
Shutter exposure speeds . .	$\frac{1}{25}$ ; $\frac{1}{50}$ ; $\frac{1}{100}$ ; $\frac{1}{250}$ ; $\frac{1}{500}$ of a second and Bulb (B)
Field of view . . . . .	20 × 28 mm

## THE "ZENITH-C" CAMERA SET INCLUDES:

- "Industar-22" coated lens
- Take-up spool
- Lens cap
- Cable release
- Leather carrying case with shoulder strap
- Instruction manual

The "Moskva-5" is a well designed roll-film camera for both 8 exposures 6 × 9 cm and 12 exposures 6 × 6 cm size.

The "Moskva-5" represents a modern development of the folding roll-film type of camera and incorporates many refinements which make picture-taking easier and good results more certain.

The "Moskva-5" camera is arranged for flash synchronizer and equipped with a self-timer.

Size of picture . . . . .	6 × 9 or 6 × 6 cm
Film spool capacity . . . . .	8 or 12 pictures
"Industar-24" coated lens:	
focal length . . . . .	110 mm
full aperture . . . . .	f/3.5
Angle of field (diagonal) . .	52°
Lens opening scale . . . . .	f/3.5; f/4; f/5.6; f/8; f/11; f/16; f/22; f/32
Distance scale . . . . .	1.5; 1.7; 2; 2.5; 3; 4; 5; 8; 15 m and infinity
Shutter exposure speeds . .	1; $\frac{1}{2}$ ; $\frac{1}{5}$ ; $\frac{1}{10}$ ; $\frac{1}{25}$ ; $\frac{1}{50}$ ; $\frac{1}{100}$ ; $\frac{1}{250}$ of a second and Bulb (B)
Range-finder base . . . . .	65 mm

## THE "MOSKVA-5" CAMERA SET INCLUDES:

- "Industar-24" coated lens
- Film spool
- Cable release
- Interchangeable frame
- Imitation leather case with shoulder strap
- Instruction manual

# "MOSKVA-5"

The "Lubitel-2" is a twin-lens reflex camera designed for amateur photographers. It uses a film with 6×6 cm size of picture.

The camera is loaded with roll film, the spool capacity being 12 pictures.

The camera body is built of plastics and is handsomely finished.

The "Lubitel-2" is fitted with a central type shutter, which is fully synchronized for electronic and flash bulbs. A self-timing device permits delayed action release for taking your own picture.

Size of picture . . . . . 6×6 cm  
 Film spool capacity . . . . . 12 pictures  
 "T-22" coated lens:  
   focal length . . . . . 75 mm  
   full aperture . . . . . f/4.5  
 Lens opening scale . . . . . f/4.5; f/5.6; f/8; f/11; f/16; f/22  
 Distance scale . . . . . 1.3; 1.5; 2; 2.5; 3; 5; 10 m and infinity  
 Shutter exposure speeds . . . . .  $\frac{1}{10}$ ;  $\frac{1}{25}$ ;  $\frac{1}{50}$ ;  $\frac{1}{100}$ ;  $\frac{1}{200}$  of a second and Bulb (B)

**THE "LUBITEL-2" CAMERA SET INCLUDES:**

- "T-22" coated lens
- Take-up spool
- Lens cap
- Cable release
- Imitation leather case with shoulder strap
- Instruction manual

# "LUBITEL-2"
